

Large Format Printer & Enlarger | by Graphic Products, Inc.

Be seen. Be heard. Echo.

Echo creates posters in an instant.

Use Echo For...

Internal Communications

Create eye-catching postings and presentations to improve information flow.

Events and Directions

Announce upcoming events and direct visitors with bold, clear signs.

Schedules and Agendas

Post project schedules and meeting agendas to keep your team focused.

Why Choose Echo?

- **Quick and Easy**
Scan and enlarge a document without any training: just put your original in the tray, and press Print. You can also print from a computer, using Echo just like a typical desktop printer.
- **Print from Anywhere**
Echo is network-ready, so users anywhere in the building can create posters. The optional wheeled travel case carries Echo and up to three extra rolls of supply, so it can be easily moved for events or meetings.
- **Low Cost**
Echo costs less to buy, and less to use, than competing systems. Echo's thermal printing process eliminates the unpredictable usage and periodic waste of inkjet systems.
- **Environmentally Friendly**
Echo's specially-formulated direct thermal Premium paper supply is BPA-free, and is recyclable all the way down to its cardboard core.

Echo Supplies

Echo's special supplies are bright, bold, and simple. No separate ink or toner cartridges needed — just the supply paper! Each supply is available in 23" and 36" widths.

- **Premium Paper**
Echo's standard supply paper provides crisp and brilliant print quality with Echo's high-speed print heads — giving your posters a dark print, a bright background, and excellent fade resistance.

Premium Paper is BPA-free and recyclable.

- **Poly Paper**
For more rugged posters, rely on Echo's water, tear and fade-resistant poly supply. Perfect for long banners or temporary signs outdoors. Poly Paper is tough enough to be hung with grommets and hooks — with the same sharp print quality as Premium Paper.
